DELINEATORS CONSTRUCTION & MOUNTING

Sign Construction:

- These signs are manufactured with rust free aluminum laminated with 3M™ Engineering Grade Reflective (Type I)
- Graphics are screen printed with 3M® Translucent inks.
- Aluminum will not chip, crack or rust. Aluminum signs will last longer than plastic or steel signs.
- Hole configuration is illustrated below, all traffic signs are supplied with 2 holes at 3/8" dia. (top & bottom)
- These signs have been designed for any of the following applications: post mounting, fence or wall mounting.
- These signs don't have any over lamination.
- Image / Text on signs is printed directly onto the reflective sheeting.
- Printed image will resist fading and most chemicals.

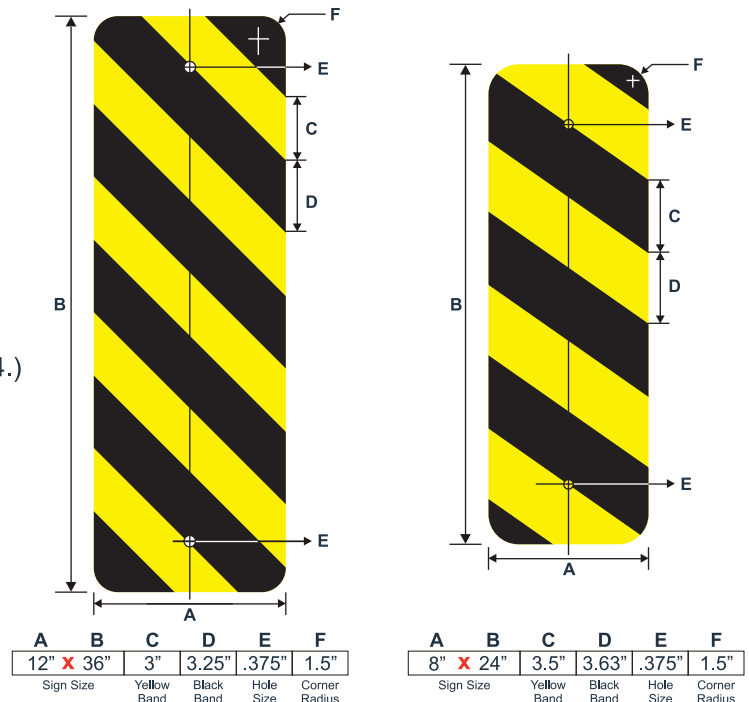

Regulatory Delineators & Commercial Delineators:

Road delineators are light reflecting devices mounted along the side of a roadway intended to be used as guidance devices to indicate road alignment changes, rather than warning devices.

Street delineator color must conform to the color of the pavement edge line on the side of the road where the delineators are placed (MUTCD Section 3B.01 and 3B.04.)

Please note, different states may have different delineator posting requirements.

We carry the most popular color combination, Yellow/Black in 2 sizes 12 x 36" & 8 x 24" to comply with MUTCD, the other colors are for commercial, off-the-street use and are available only in 8 x 24".

Delineator Mounting on U-Channel Post:

What do you need when mounting signs?

If you are mounting signs to a U-Channel Post, the following hardware accessories are required.

- 1 U-channel post, sizes range from 4ft to 12ft, either Green or Galvanized finishes.
- 1 Bolting Set (Part# Y3465 or Y4899)
Set includes washers, bolts and nuts, or
- 1 Tamper proof Set (Part# Y4900 or Y4901)
Set includes washers, one way bolts and break away nuts
- Please follow the installation steps shown on the illustration.
