Bicycle Traffic Warning Sign MUTCD W11-1

MATERIAL THICKNESS	MATERIAL NAME	CHEMICAL RESISTANCE	OUTDOOR DURABILITY	TEMP RANGE	CORNER RADIUS	MOUNT HOLES
.080"	Yellow/Green Fluorescent Diamond Grade Reflective on Rust Free Aluminum	Fading & Mild Chemicals	10+ Years	-40°F to 200°F	1-1/2"	2 @ 3/8"

- 3M™ Diamond Grade™ Type IX Reflective Sheeting is a super-high efficiency, retro-reflective sheeting designed for signs that need to be highly visible during daytime, nighttime, twilight, and inclement weather.
- Excellent visibility at wide entrance and observation angles.
- This sheeting is designed to have the highest retro reflective characteristics at medium and short road distance.
- Diamond Grade fluorescent reflective sheeting provides higher visibility than ordinary (non-fluorescent) colored sheetings.
- Diamond Grade is 10 times brighter than Engineering Grade or High Intensity Prismatic retro-reflective Sheeting.
- **3M™ Warranty:** 3M™ Diamond Grade™ Reflective Sheeting will remain effective for its intended use and meet minimum required values for coefficient of retro-reflectivity for up to 12 years.
- **3M™ Fluorescent Orange Workzone Reflective Sheeting** will remain effective for its intended use and meet minimum required values for coefficient of retro-reflectivity for up to 3 years.
