# 30lb Base for Vertical Channelizer Panel - X8307

### Key Features:

- 30lb weighted base provides maximum stability for vertical channelizer panels
- Heavy-duty material ensures durability in high-traffic and outdoor environments
- Designed for easy transport and quick setup
- Compatible with standard vertical channelizer panels (sold separately)
- Ideal for construction sites, detours, and highway traffic control

Our 30lb Base for Vertical Channelizer Panels provides a heavy-duty solution for stabilizing traffic control devices in demanding environments. This weighted base offers superior support to ensure vertical channelizer panels remain upright, even in high-wind conditions. Its durable construction allows for long-term use in work zones, highways, and parking areas where extra stability is required.
