1³/₄" Square Post Surface Mount Base

The square post surface mount base is a great choice when you need to install a sign post in concrete or asphalt surfaces and don't want to cut through them to install the post. Made of galvanized steel for durability. It has four 9/16" mounting holes in each corner of the base plate for anchoring the base to the ground.

Each Square Post Surface Mount Base comes with 2 corner bolts and 2 nuts to secure a sign post. It can also be ordered with a concrete anchor kit which contains four 1/2" x 4" lag screws, four 3" plastic anchors, and four 1/2" washers, or it can be ordered with an asphalt anchor kit which contains four 6" anchors, four 1" hex head bolts, 4 washers and 2 bags of concrete based grout.
